An easy to use, web-based EDI solution without the investment

NeTIX® STARTER

It's EDI, but without the overhead...

NETIX Starter is an easy to use, web-based EDI solution that has been designed to meet the modern requirements of small-medium sized businesses. It brings all the benefits and functionality traditionally provided to larger companies but without the investment overheads and complexity.

With no software to install and the gentlest of learning curves, you'll be exchanging EDI documents with your trading partners in a matter of hours, Starter edition is perfect for suppliers who have recently secured their first major contract with any high street retailer or low volume users who require a cost effective solution to trade straight away. No installation procedures, no operating system conflicts – just a maintenance free, user friendly, accessible from anywhere web application that places no limits on the number of users, EDI trading partners or documents exchanged.

Ideal for companies that:

- Don't want to rely on IT personnel for keeping their EDI software and hardware up-to-date

- Don't have any EDI knowledge

- Would like mobility in their EDI solution. You can access the service wherever you have an internet connection.

- Have a requirement for EDI software to satisfy their Customers

- Are looking for a simple interface that gives full control over all your EDI data and network traffic

Bringing the Trading Community Together

Organisations have always been challenged when trying to integrate 100% of their trading community. NeTIX starter based framework has been designed and built for the next generation user experience, enabling the automation of electronic documents with any trading partner.

Benefits of NeTIX Starter

Multiple Users
Starter supports an unlimited number of users and allows the definition of roles to provide your staff with different levels of access - from Administrator privileges down to limiting certain users to specific system views.

Simple, Friendly Interface
Users are notified of the arrival of New Orders via an email alert, which contains a convenient link to the document helping to ensure you stay on top of things.

Intuitive Web Forms
When you create or process an EDI document the appropriate trading partner overlay is applied and an intuitive web form is shown to highlight the mandatory fields required by your trading partner. Starter will auto populate as many fields in the web form as possible (using information from the Order document that you're processing from) to reduce data entry.

Data Compliance
Starter uses a validation status to ensure the outbound document matches your Trading Partner EDI specifications. If data is missing or the format is incorrect, then the status will be marked as invalid requiring you to correct the errors before it allows you to send the document. This ensures you always send compliant EDI documents, resulting in no trading partner rejections.

Document Management
Starter provides many features to help you manage your EDI activities. A different status is assigned to each document (such as 'Pending', 'In progress') to indicate exactly where you are in terms of completing the relevant document.

Search
You can quickly locate any type of document using the NeTIX search service. Use the interface to apply different filters and group by column heading to quickly jump to a tailored view or filter.

Pricing
Because Starter is a service-based application and network service rolled into one, pricing is subscription based. Our low cost subscription is tiered so that you only pay for the resources that you use.

NeTIX Starter is the ideal turn-key solution for companies who are not interested in setting up their own in-house EDI operation.

The need for investing in IT infrastructure and specialist staff is taken away with the introduction of this intuitive web-based offering from NetEDI.

The NeTIX starter solution becomes a proxy which communicates with the trading partners on your behalf. Using a friendly web interface, EDI transactions can be received, edited and sent as easily as an e-mail.

NeTIX starter receives EDI data from your trading partner and converts it into a friendly display for your review. Sending data to your partner is as simple as filling out a form and clicking send. NEForms seam- lessly transforms your data into EDI and transmits it to your partner.

NeTIX Starter receives EDI data from your trading partner and converts it into a friendly display for your review. Sending data to your partner is as simple as filling out a form and clicking send. NeTIX Starter seamlessly transforms your data into EDI and transmits it to your partner.

Fast-Tracking EDI Supplier enablement

NetEDI have developed a unique fast-track enablement for Retail Suppliers which promises to drastically reduce the time taken to bring a supplier on board. An online registration form is made available for the supplier, which, upon completion, processes their details and allows their EDI solution to be made available and ready to go.

NeTIX Cloud

The NeTIX starter Cloud computing solution allows small to medium sized companies to utilize and leverage technologies that were traditionally inaccessible by helping to cut costs, add expertise and remove complexity. Avoid capital expenditure on new hardware, software and other peripheral services when you only pay for what you use.

By eliminating these operating costs while receiving strategic services through a pay as you go model, your company is cutting costs without sacrificing the quality of your service.

In addition, by utilising the internet and a browser, you can access the NeTIX starter application and all of your data anytime, any place. This offers great versatility and affords more flexible working patterns.

Growing your Business with EDI

Enabling yourself with NeTIX Starter EDI functionlity will present new growth opportunities for your business. You will be opening your organisation up to new trading com- munities intent on transacting electronically with their sup- plier base. The NeTIX Starter solution will evolve as your business expands and NetEDI will actively advise on how best to handle your trading volumes and progress with your solution. NetEDI Integration Adapters are available for ensuring that the growth of your business and EDI solution go hand-in-hand.

Expert Assistance

In addition to a hosted infrastructure, your company also has access to a trained team of experts that are focused on your needs to provide you with an excellent response and deal with any of your customer's needs. We can assist in a whole variety of matters. Should any problems arise with your partners, there will be someone on hand for helping to quickly and effectively address these issues.
